Fabien Duterte
engineer apprentice
Languages

🇬🇧 English
🇫🇷 French (native)

Skills

PHP

Laravel

SQL, PSQL MySQL

Java

Javascript

Python

Node.js

Hobbies

Programming

80's music

Team games

Degrees / Studies

● **Preparing engineering school**
2020-2023 Lens, IG2I

● **IT University Tech Degree preparation**
2018-2020 Lens University Tech Institute

● **Scientist Baccalauréat**
2017-2018   *High School Diderot, Carvin*

Personnal Projects

● **Web Marathon**
Creation of a website in team (3 for the back part, 4 for the front part) for 2 days in a row with the Laravel framework.

● **Portfolio**
My portfolio is available at https://hypario.netlify.com/ as his github at www.github.com/Hypario/portfolio

● **My Framework**
In order to gather all my knowledge in PHP, I developed my own PHP framework which I use for my small personal projects. Available at www.github.com/Hypario/Framework

● **A web router**
During my self-taught learning, I developed a web router in PHP that I use today for my framework.

● **Stormbox**
Stormbox is a web api allowing to upload and download files, videos, images or others.
A web client is provided as standard in order to offer a user interface. All of this was developed in PHP using my own PHP Framework. Available at www.github.com/Hypario/stormbox

● **Ray tracing**
As a DUT year-end project, I had the opportunity to develop a Raytracing application, allowing me to generate images with a 3D effect, that I have continued to develop since. Available at www.github.com/hypario/lanceurderayon
